BESSONG AVIATION TRAINING ACADEMY (BATA)

A Training Division of Global-Elect Management Company

AI for Aviation Professionals Certificate

Duration: 4 Weeks Delivery: 100% Online Tuition: $199

PROGRAM OVERVIEW

The AI for Aviation Professionals Certificate introduces artificial intelligence in plain language and shows how it is being applied across aviation operations, safety and compliance. Over four weeks, students cover AI fundamentals, governance, risk, automation and future trends, including an introduction to AuditGuard AI.

LEARNING OUTCOMES

- Explain core AI concepts and terminology
- Identify practical AI applications in aviation
- Apply AI governance and responsible-use principles
- Recognize the risks and limitations of AI systems
- Evaluate automation opportunities in aviation workflows
- Discuss future aviation technology trends

CURRICULUM

- Week 1 - AI Fundamentals and AI in Aviation
- Week 2 - AI Governance and Risk Management
- Week 3 - Automation in Aviation Workflows and AuditGuard AI Introduction
- Week 4 - Future Aviation Trends and Final Project

ENROLLMENT REQUIREMENTS

- Completed online application
- Secondary school completion or relevant aviation work experience
- Working proficiency in English
- Computer or tablet with a reliable internet connection
- Tuition payment (full or installment plan)

BATA certificates are professional development credentials and are not academic degrees.
